- The intuitive content management system made it easy for me to create and organize pages for my class project without needing to learn complex coding. I could focus on the content rather than getting stuck on technical details.
- The variety of free templates available saved me a lot of time when designing my website. I found one that matched my project's theme, and I could customize it enough to make it feel unique without starting from scratch.
- The extension library has been really helpful. When I needed to add a calendar for event scheduling and a form for collecting feedback, I was able to find extensions that added these features quickly instead of trying to build them myself.
